WORK EXPERIENCE

Software Developer

Osian Software Pvt. Ltd

03/2022 - Present

Achievements/Tasks

- Developed and maintained a complex web application using Python Django and Django Rest Framework (DRF).
- Implemented Wrapper APIs in DRF to communicate with external BI APIs and Recommendation services.
- Designed and generated dynamic PDF documents using Plotly to add interactive visual elements, enhancing reporting functionalities and data visualization.
- Improved the UI/UX of a Laravel web application designed for managing talent profiles for a prominent global entertainment provider.
- Collaborated closely with a cross-functional team to test and successfully deploy the application.
- Assumed responsibility for maintaining and enhancing existing applications, proactively addressing security issues identified by the Infosec team.

Software Developer

Hridayam Soft Solutions

03/2021 - 03/2022

Achievements/Tasks

- Developing and maintaining Rest APIs to meet project requirements and desired functionality using best practices.
- Maintaining Database by creating tables and writing triggers for audit trail and SQL functions for fetching data.
- Contributing ideas and suggestions in team meetings with Colleagues and effectively sharing task progress, evaluations and process issues.
- Fixed bugs from existing Document Management Solution and implemented enhancements that improved web functionality.

Hadoop

PERSONAL PROJECTS

Clothify - Ecommerce clothing store (09/2023 - 10/2023)

- Built clothing ecommerce web application using Django, Jquery, Ajax and Bootstrap. MySQL is used as a database and Github as a version control system to maintain the codebase.
- Github: <https://github.com/Sameer1295/Clothify-Ecommerce-Django>

Secure File Storage System (10/2022 - 05/2023)

- Developed in Django MySQL and uses AWS S3 for file storage. The objective of the application is to provide users with a secure and reliable online file storage solution. This application uses encryption algorithms to secure user data before storing it on cloud-based storage services.
- Github: <https://github.com/Sameer1295/secure-file-storage-app>

Real time Cryptocurrency Prices Tracker (11/2023 - Present)

- Built Real time Cryptocurrency price tracker using Django Celery and Redis to fetch and display crypto currency prices from ConGecko API
- Github : <https://github.com/Sameer1295/Real-time-Cryptocurrency-Prices-Tracker>
